FYRES: Dunes Research Report: Brinks, Linden, Kathryn E. Gerber, Jen-Li Sin, Jacob T. Swineford and Alek K. Zapata (2013). "The Effects of Two Fall Storms on a Lake Michigan Foredune." FYRES: Dunes Research Report #7. Grand Rapids (MI): Department of Geology, Geography and Environmental Studies, Calvin College. 17 p.

Abstract: Storms contribute to the shape of a beach-dune system but few studies describe specific effects of storms on a foredune environment. We studied changes that autumn storms made to a foredune located in P.J. Hoffmaster State Park on the east coast of Lake Michigan. We used a number of methods including on-site anemometers and a wind vane, erosion pins, GPS, photos, observations, and storm data from the National Weather Ser3n p. p.p.p.p.d sroEMC
